"Stumble and fall but never give up"

PROJECTS

Medical appointment System | 2018.09 ~ 2018.11

• As a team project assignment of COMP1531 course (Software Engineering Fundamentals), our team built up the medical enrollment system using Python/Flask/HTML/CSS/Pickle. The system enables users(patients/medical staffs) to book and manage medical appointments.

I was in charge of documenting user's requirements(Writing User stories/Constructing UML Diagram) and implementation of User Login part/Constructing & Managing the database of website usage history/General Connection from back-end (Python/Flask) to front-end (HTML).

Dungeon Explorer | 2019.09 ~ present

● As a team project assignment of COMP2511 course (Object-Oriented Design & Programming), our team built up a game "Dungeon Explorer" using Java/Java FX/Scene Builder. Explaining briefly about the game, an user can play with a various types of items/enemies in a dungeon to complete the dungeon.

I am currently in charge of documenting user's requirements and implementation of most of back-end Logic (Player/Enemy movement logic, Item pickup logic etc)/front-end(User interface)/refactoring part according to various Object Oriented design patterns/principles.

TECHNICAL SKILLS

Programming Languages

• C: ☆ ☆ ☆ ☆ ☆ (5/5)

• Python/Flask: ☆ ☆ ☆ (3/5)

• Java/Java FX: ☆ ☆ ☆ (3/5)

Front-end

• HTML: ☆ ☆ ☆ (3/5)

• Scene Builder: ☆ ☆ ☆ (3/5)

Data Base

• PostgreSQL: ☆ ☆ ☆ (3/5)
